

AllMapping Tech Company

Presentation

Problem Statement

Universities, especially large campuses, often suffer from poor navigation, leading to frustration for students, staff, and visitors.

The Opportunity

Trend

As universities embrace digital transformation, there is a growing need for advanced campus management tools that improve accessibility and efficiency.

Market Need

1000+ universities globally need modern, scalable indoor mapping solutions that integrate with existing campus technologies.

Impact

A robust indoor mapping system can enhance campus experiences, improve operational efficiency, and provide valuable data insights for facilities management and planning.

The Solution

Our Product: An advanced indoor mapping platform specifically designed for universities.

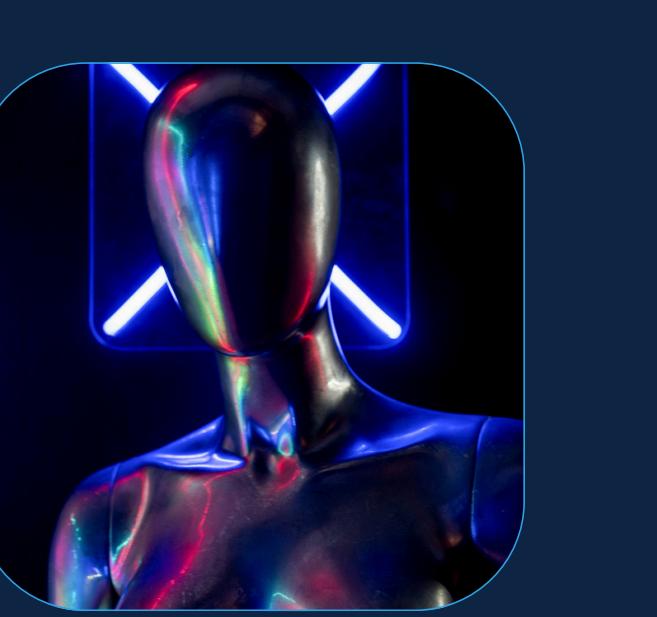

- **Interactive 3D Maps:** Easy-to-use, real-time, interactive 3D maps for navigating campus buildings, classrooms, lecture halls, and amenities.
- **Wayfinding:** Turn-by-turn navigation tailored to students, faculty, staff, and visitors.
- **Integration with Campus Systems:** Sync with university databases to show live class schedules, event locations, and building availability.
- **Data Insights:** Collect data on foot traffic, building usage, and event flow to improve space utilization and campus planning.

Key Features

Real-Time Navigation

Real-time indoor positioning using QR Codes placed in different locations.

Event & Class Integration

Integration with academic schedules, displaying the location and directions to classrooms, labs, and events in real-time.

Customizable Layouts

Tailor maps to reflect university-specific features, such as dorms, dining halls, libraries, etc.

Market Validation

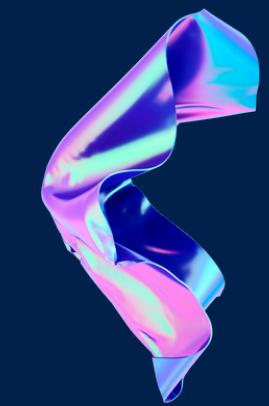

Current Adoption

Increasing interest from large universities and institutions.

Potential Impact

With more than 20 million students enrolled in universities worldwide, we aim to revolutionize campus navigation for millions.

Marketing Channels

University conferences and expos.
- Digital marketing targeting university administrators.
- Alumni networks and campus tech incubators.
